

**TABLEMAX LEADS THE WAY  
AS ELECTRONIC TABLE GAMES EMERGE AS  
FASTEST GROWING SEGMENT IN GAMING PRODUCTS INDUSTRY**

LAS VEGAS (April 10, 2009) – Electronic table games have quickly emerged as the fastest growing segment in the gaming products industry, and leading the way are the innovative, and fun, products from TableMAX Gaming.

TableMAX is a developer of electronic table games, and the company designs, engineers and distributes patented electronic table games worldwide. TableMAX owns global rights to popular table game content, including Progressive Blackjack®, Caribbean Stud® Poker, Caribbean Draw® Poker, Texas Hold 'Em Bonus® Poker and Bonus Blackjack®.

Casinos across North America have been racing to get TableMAX Systems on their floors, and sales have been extremely brisk, particularly in the thriving Palm Springs, San Diego, and Oklahoma markets. Everywhere TableMAX games have been installed, players are very quick to learn the games, and it is not unusual for properties to see a line of players three people deep waiting for a chance to play.

The Eastern Shawnee Tribe of Oklahoma was one of the first operators to place TableMAX systems, and the Tribe has since placed multiple TableMAX systems at its casino properties in Eastern Oklahoma, including Bordertown Casino. Bordertown Slot Director Steve Blazer said, “We’re excited to be the first property to install TableMAX’s electronic version of Caribbean Draw Poker. The TableMAX systems have been great additions to our floor, and our players really enjoy them.”

As for the games, Caribbean Draw poker plays much the same as Caribbean Stud poker, but allows the player to discard up to two cards, which further enhances the feel of a “live” table game experience and increases the player’s interactivity. The game also features an exciting optional 50 cent side bet, enabling TableMAX’s exclusive progressive jackpot.

Caribbean Stud Poker gained widespread popularity immediately upon its release and has been a mainstay of the casino floor ever since. The TableMAX version of Caribbean Stud Poker is played on the company’s electronic table game platform, taking the game to a multi-table/multi-casino network. On the TableMAX platform, players compete for slot like progressive jackpots. Jackpots are paid when a player successfully is dealt a sequential royal flush or a reversible sequential royal flush.

TableMAX’s Progressive Blackjack takes traditional Blackjack to the MAX, without changing the player’s strategies or the casino’s rules of play. In Progressive Blackjack, side bets are focused on the number of consecutive Aces dealt to a player in any one hand, regardless of split and/or double-down rules.
