

TABLEMAX BRINGS PLAYER EXCITEMENT TO THE MAX AT NIGA

LAS VEGAS (April 15, 2008) – The most exciting slot product on the NIGA trade show this year doesn't look like a slot product at all. In fact, it is so unique and so fun, that it attracts both slot *and* table players. Now players can get in on the fun, and tribal casinos can get an increase to the bottom line with TableMAX.

The 17th annual NIGA trade show. NIGA takes place April 20-23 at the San Diego Convention Center, and from booth #2131, TableMAX will be showing the proven future of the gaming industry – electronic table games.

TableMAX Vice President of Sales Benjamin Parks said, “Studies and in-casino use have clearly shown that electronic table games are the industry's next big demand from players, and TableMAX has the products to satisfy that demand. TableMAX delivers the table gaming experience but with the convenience and labor savings of dealerless, automatic table games, meaning instant cost savings in labor and supplies.”

Additionally, TableMAX has added excitement of established table content with global rights to popular table games—Progressive Blackjack™, Caribbean Stud® Poker, Caribbean Draw® Poker, Texas Hold 'Em Bonus Poker and Bonus Blackjack. TableMAX adds even more exhilaration with wide area progressives for players to play longer and more frequently.

Best of all, the tables consume 20 percent less square footage per gaming position than a comparable number of slot machine positions. The TableMAX five-player games are configurable, which allows operators a variety of set up options, encouraging players to take full advantage of a fun, easy and relaxed community gaming style.

TableMAX Holdings LLC is a leading developer of electronic table games and designs, engineers and distributes patented electronic table games worldwide. TableMAX owns global rights to proven and popular table game content, including Progressive Blackjack™, Caribbean Stud® poker, Caribbean Draw® poker, Texas Hold 'Em Bonus Poker and Bonus Blackjack.
